PROFESSIONAL SUMMARY

Diagnostic medical sonography student with a strong foundation in general and vascular ultrasound and over 10 years of experience supporting individuals in healthcare and residential settings. Skilled in patient-centered care, communication, and crisis intervention, with hands-on exposure to abdominal, small parts, vascular, and introductory cardiac and musculoskeletal imaging. Seeking a clinical placement and entry-level sonography role where I can contribute excellent patient care, strong teamwork, and growing technical skills.

EDUCATION

Academy of Diagnostic and Osteopathic Medicine (ADOM) – Danbury, CT

Diagnostic Medical Sonography and Vascular Technology with Diagnostology

2000 Hour Comprehensive Didactic and Clinical Program

Expected Graduation: October 9, 2026

The University of Scranton – Scranton, PA

Bachelor of Science in Counseling and Human Services (CSHSE-Accredited Program)

May 2013

CLINICAL EXPERIENCE

Nussbaumer Health, LLC – Ultrasound Screening Program

Danbury, CT | April 13, 2026 – May 1, 2026

Ultrasound Screening Scenario and Simulation (Preparatory to Clinical Placement)

- Completed intensive preparatory rotation with up to 45 independent outpatient ultrasound screening exams designed to simulate real-world clinical workflow.
- Managed the full patient encounter: calling patients from the waiting room, verifying identity, obtaining basic history, positioning, and preparing the exam room.
- Performed supervised carotid, thyroid, abdominal, pelvic, prostate, vascular, and aortic screening exams with attention to image optimization and Doppler technique.
- Generated preliminary reports and presented findings to the interpreting radiologist for review and feedback.
- Followed infection control and safety protocols, including room turnover and equipment cleaning between patients.

- Tendon evaluation (introductory)
- Joint space assessment (introductory)
- Basic inflammatory vs. fluid differentiation

Basic Cardiac (Introductory)

- PLAX, PSAX, apical views
- Chamber identification
- Introductory ventricular function assessment

ULTRASOUND EQUIPMENT

- GE Logiq E
- GE Versana
- GE Vscan
- Mindray MX7
- Image archiving systems

CERTIFICATIONS & ELIGIBILITY

- CPR / BLS Certified
- ARDMS Registry Eligible

RELEVANT PROFESSIONAL EXPERIENCE

Site-Based Respite Program Manager

Community Based Services – Hopewell Junction, NY | May 2021 – September 2025

- Led programs to build independent living skills, social engagement, and community integration for young adults with intellectual and developmental disabilities.
- Supervised and coached direct support staff to promote consistency, accountability, and retention.
- Developed and facilitated cooking, budgeting, health and wellness, and social skills groups in a safe, structured environment.
- Coordinated community outings, ensuring safety and adherence to regulatory standards.
- Collaborated closely with families and interdisciplinary teams using a person-centered approach.

Assistant Program Manager

Ability Beyond – Chappaqua, NY | October 2017 – April 2021

- Served as primary contact for parents/guardians, addressing behavioral and support needs to promote safe participation.
- Created structured lesson plans and individualized activities to support consistent, goal-focused programming.
- Completed incident reports and supported investigations in accordance with agency and regulatory requirements.
- Managed staff schedules to maintain required ratios in compliance with OPWDD guidelines.
- Oversaw activity budgets and maintained accurate attendance and documentation.

Assistant Supervisor / Senior Youth Counselor

Green Chimneys Children's Services – Brewster, NY | September 2013 – October 2017

- Provided direct supervision and support to children and adolescents in a therapeutic residential setting.
- Helped develop daily routines and programming to promote structure, safety, and engagement.
- Offered peer leadership and mentorship to staff to enhance teamwork and consistency of care.
- Participated in an interactive dog program to support emotional regulation and engagement.
- Collaborated with multidisciplinary teams to support coordinated, person-centered care.
