PROFESSIONAL SUMMARY

Diagnostic Medical Sonography and Vascular Technology student with experience in healthcare administration and patient-facing clinical environments. Trained in general sonography, vascular technology, gastrointestinal, musculoskeletal, and foundational cardiac imaging with exposure to pediatric and geriatric populations. Skilled in Doppler techniques, preventative screening, pathology correlation, and patient-centered care. Strong background in medical reception, communication, and workflow coordination within hospital systems. Seeking clinical placement and entry-level sonography opportunities to further develop technical expertise and contribute to high-quality diagnostic imaging services.

EDUCATION

Academy of Diagnostic and Osteopathic Medicine (ADOM) – Danbury, CT

Diagnostic Medical Sonography and Vascular Technology with Diagnostology

2000 Hour Comprehensive Didactic and Clinical Program

Expected Graduation: October 9, 2026

CLINICAL EXPERIENCE

Nussbaumer Health, LLC – Ultrasound Screening Program

Danbury, CT | [Insert Rotation Dates]

Ultrasound Screening Scenario and Simulation (Preparatory to Clinical Placement)

- Completed preparatory clinical rotation performing supervised outpatient ultrasound screening exams designed to simulate real-world clinical workflow.
- Managed patient intake including identity verification, basic history collection, positioning, and exam room preparation.
- Performed carotid, thyroid, abdominal, pelvic, prostate, vascular, and aortic screening exams with attention to image optimization and Doppler technique.
- Obtained accurate measurements and participated in structured supervisory review and feedback.
- Followed infection control protocols and ensured equipment turnover between patients.

Additional Clinical Site

Clinical Rotation – To Be Scheduled

ULTRASOUND SKILLS

General Sonography

- Abdomen (complete & limited): liver, gallbladder, pancreas, spleen, kidneys
- Renal
- Thyroid
- Breast
- Transabdominal pelvic
- Transabdominal prostate

Gastrointestinal (Adult & Pediatric)

- Stomach
- Pylorus (pyloric stenosis evaluation)
- Intussusception
- Appendix
- Introductory bowel evaluation

Vascular Technology

- Carotid duplex
- Upper & lower extremity arterial duplex
- Upper & lower extremity venous duplex
- Abdominal aorta duplex
- Portal venous & hepatic Doppler
- Renal artery Doppler

Musculoskeletal (Introductory – Adult & Pediatric)

- Superficial soft tissue structures
- Tendon evaluation (introductory)
- Joint space assessment (introductory)
- Basic inflammatory vs. fluid differentiation

Basic Cardiac (Introductory)

- PLAX, PSAX, apical views
- Chamber identification
- Introductory ventricular function assessment

Specialty Population Exposure

- Pediatric imaging considerations
- Geriatric imaging considerations

ULTRASOUND EQUIPMENT

- GE Logiq E
- GE Versana
- GE Vscan
- Mindray MX7
- Image archiving systems

CERTIFICATIONS & ELIGIBILITY

- CPR / BLS Certified
- ARDMS SPI – Pending
- CCI Registry Eligible

RELEVANT PROFESSIONAL EXPERIENCE

Medical Practice Patient Representative Float

Nuvance Health – Poughkeepsie, NY | September 2024 – Present

- Verify patient demographics and insurance information to ensure accuracy and compliance.
- Register, schedule, and coordinate appointments, testing, and referrals.
- Answer and route calls while maintaining clear and professional communication.
- Provide front desk support in high-volume healthcare settings.

Receptionist
