Experience includes Doppler waveform analysis, image optimization, accurate measurements, documentation, patient education, and infection control.

ULTRASOUND SKILLS

General Sonography

- Abdomen (Complete & Limited)
- Liver, Gallbladder, Pancreas, Spleen
- Renal
- Thyroid
- Breast
- Transabdominal Pelvic
- Transabdominal Prostate

Gastrointestinal (Adult & Pediatric)

- Stomach
- Appendix
- Introductory bowel evaluation

Vascular Technology

- Upper & Lower Extremity Arterial Duplex
- Upper & Lower Extremity Venous Duplex
- Abdominal Aorta Duplex
- Portal Venous & Hepatic Doppler
- Renal Artery Doppler
- Color, Power & Spectral Doppler
- Basic Hemodynamic Assessment

Musculoskeletal (Introductory – Adult & Pediatric)

- Superficial soft tissue structures
- Tendon evaluation (introductory)
- Joint space assessment (introductory)
- Basic inflammatory vs. fluid differentiation

Basic Cardiac (Introductory)

- PLAX, PSAX, Apical Views
- Chamber Identification
- Introductory Ventricular Function Assessment

Specialty Population Exposure

- Pediatric imaging considerations
- Geriatric imaging considerations

ULTRASOUND EQUIPMENT

- GE Logiq E
- GE Versana
- GE Vscan
- Mindray MX7
- Image optimization (Gain, Depth, Focus, TGC)
- Doppler optimization
- Image archiving systems
